Re: Updated Tag Details
Date: 08/21/2024

Greetings!

Tag details that refer to production flaws such as electroform holes (EF Hole) or minor discrepancies such as small dents (S.Dented), etc will be discontinued. Instead, tags will use the space for more descriptions and details of the items.

Ex: Details to be discontinued are in encircled:

Moving forward, items with minor discrepancies but are still sellable will not require the description of the minor discrepancy to be included in the tag.

This will be effective beginning August 22, 2024

Signed,

Angelo Miguell T. Natividad

Supply Chain Director
